Kenneth Yelich
410 3RD AVE SW APT 406
Sidney, MT 59270-4041

August 29, 2007

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Kenneth Yelich
4064802943

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Besides all those aforementioned as in need of broadband internet, there are a lot of elderly people who live secluded lives and who depend on cheap ISPs to bring them the sights of the rest of our fellowmen around the world and a lot of other worthy information that at their silvery years enrich their knowledge of our world.

I humbly say that I am one of those aforementioned. I am 79, live by myself, financially broke, depend on my monthly Social Security which is enough to pay for rent and utilities, also receive Medicare parts A, B and D (no Medicaid), also receive State Food Stamps and the Osceola Council on Aging brings me a meal five days a week and provides me transportation to doctors offices, pharmacy and shopping trips local food markets. I pay reduced telephone service and the cheapest cable monthly fees available. And, even though the ISP is cheap I'll very likely may give it up because I can no longer make ends meet financially.

Please support M2Z today.

Sincerely,

Saul J. Riera

Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.
